

SOFiE ToolBox Informer is a complementary tool for SOFiE Sort developed by U IT for the users or managers in charge of the legal reporting. The tool's main functionality is to inform on the status of all sent and received files of the current or previous activity day.

The screenshot shows the U IT STB Informer application window. The title bar reads "U IT STB Informer - v1.2.0 - License granted to the company 'UIT Sarl'". The main interface includes a header with the application name, a date and time display, and a status section for "Thursday, 09/03/2017 SOFiE Status :". Below this is a table of report activity. Callouts 1 through 9 identify specific UI elements: 1. Send / received filters, 2. Summary status, 3. Export to CSV, 4. Help & license panel, 5. Parameters & settings, 6. Exit or minimize, 7. Refresh, 8. Previous day activity, and 9. Feedbacks Viewer.
